

Imaging Informatics

GRADUATE CERTIFICATE PROGRAM

Changing technologies are fueling a growing demand for qualified Imaging Informatics health care professionals.

Michener's *Imaging Informatics Graduate Certificate Program* is the first and only program in Canada with hands-on laboratory and clinical experience. The program incorporates four online theoretical courses with one lab session and a four week full-time clinical practicum. Graduates of the program will be prepared to write the American Board of Imaging Informatics Certification examinations.

Upon completion of the program you will:

- Understand the practical and operational issues essential to a successful PACS implementation
- Evaluate and compare the relative merits of currently available Imaging Informatics components and options
- Understand the importance of optimum system integration (i.e. the Electronic Health Record)
- Define strategies, benefits and limitations of enterprise image distribution
- Apply practical operational strategies that will create increased workflow efficiencies
- Create an effective and efficient Imaging Informatics QA program
- Learn about the latest advances in Imaging Informatics technology

Application Deadline Nov 15
